WRIGHT & LATO has figured out that titanium is a perfect material for men's jewelry. When fashioned into rings, the strong, lightweight metal can take abuse. In addition to being strong, these titanium men's wedding bands are also hypo-allergenic and have unique coloring. Suggested retail prices start at \$100. For more information, call (800) 724-1855.

The November 2007 issue of *In Store Magazine* featured titanium wedding bands from Wright & Lato on page 42. The merchandise is also positioned on the front cover of this special edition that highlights alternative metal jewelry.
